Web Developer

Hard-working web developer with a flair for creating elegant solutions in the least amount of time. Passionate about software architecture and finding innovative solutions to problems. I enjoy using technical, analytical and problem-solving skills to create dynamic, high-speed websites, apps that help fuel competitive advantage and revenue growth.

Class Projects

- Designed a crowd-sourcing website using Mapbox API to help users locate either a bicycle rack, water fountain or bathroom. Users are allowed to search for a certain spot that they are interested in and to input a new location by clicking directly onto the map.
 - Created a sports website where users were allowed to chat about basketball, football, baseball and hockey. A sports api was used in order to bring in live information to users. Each page is implemented with a separate chat that so that users can chat about the specific sport they are most interested in.
-

Education

Full Stack Developer Bootcamp at the University of Minnesota-Twin Cities • July 2019

University of Minnesota-Twin Cities • Bachelor of Science in Biology 2012

Technology Summary

HTML5, CSS3, Vanilla JavaScript, jQuery, React, MongoDB, MySQL, Node.js, Bootstrap, Firebase, Java

Professional Experience

Hennepin County Medical Center • Laboratory Assistant, April 2016- current

- Used healthcare software such as Epic and Cerner to access patients records and to help analyze any issues pertaining to laboratory work
 - Stored and tracked all specimens in the lab by using database software, and suggested how certain lab test could be processed quicker by updating the lab test directory
-
