Web Developer

Hard-working web developer with a flair for creating elegant solutions in the least amount of time. Passionate about software architecture and finding innovative solutions to problems. I enjoy using technical, analytical and problem-solving skills to create dynamic, high-speed websites, apps that help fuel competitive advantage and revenue growth.

Class Projects

• Designed a crowd-sourcing website using Mapbox API to help users locate either a bicycle rack, water fountain or bathroom. Users are allowed to search for a certain spot that they are interested in and to click directly onto the map in order to create and save a new spot into the database.

• Created a sports website where users where allowed to talk about basketball, football, baseball and hockey. A sports api was used in order to bring in live information to users. Each page is implemented with a separate chat that so that users can chat about the sport they are most interested in.

Education

Full Stack Developer Bootcamp at the University of Minnesota-Twin Cities • July 2019

University of Minnesota-Twin Cities • Bachelor of Science in Biology 2012

Technology Summary

HTML5, CSS3, Vanilla JavaScript, jQuery, React, MongoDB, MySQL, Node.js, Chai.js, Firebase, Java

---

Professional Experience

Hennepin County Medical Center • Laboratory Assistant, April 2016- current

•Used healthcare software such as Epic and Cerner to access patients records and to help analyze any issues pertaining to laboratory work

•Stored and tracked all specimens in the lab by using database software, and suggested how certain lab test could be processed quicker by updating lab website
