Projects

Inventory Management Project
https://inventory.tonymdesigns.com/dashboard

Created an inventory system that will keep track of all inventory within the lab. A unique QR code will be generated for each item , each containing meta data such as: item quantity, expiration date, etc. A background service will notify users if an item is low or about to expire

CrowdSoucing Project
https://crowdsourcing.tonymdesigns.com

A crowd-sourcing site that implements Google Maps Api. It allows users to look up and post current food truck locations

—

Education

Trilogy FullStack Bootcamp
January 2019 -August 2019, St.Paul, MN

University of Minnesota / Biology
September 2008 - May 2012,   Minneapolis

—

Experience

Hennepin Healthcare
Lab Assistant, May 2016 -current , St.Paul, MN

Troubleshoot laboratory equipment by checking error logs to diagnose whether it is either hardware or software issue

Stored and tracked all specimens by using management software and suggested new ways the lab test directory could be updated
